

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Monitoring Requirements Not Met for Village Of Taos Ski Valley

Este informe contiene información importante acerca de su agua potable. Haga que alguien lo traduzca para usted, o hable con alguien que lo entienda.

On 11/18/2016, we became aware that our system recently failed to collect monitoring samples required by the Stage 2 Disinfectants/Disinfection Byproducts Rule. Although this incident was not an emergency, as our customers, you have a right to know what happened, and what we are doing to correct the situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. Table 1 list the contaminants and the compliance periods for which we did not monitor correctly. Because these samples were not collected, we cannot be sure of the quality of our drinking water during the compliance periods listed below.

Table 1

Contaminants	Sample Name (Address)	Sampling Frequency	Compliance Period(s)
Total Trihalomethanes and Haloacetic Acids	TTHM-1 – 111 Twining Road HAA5-1 – 7 Firehouse Road	Yearly	2016

What should you do?

There is nothing you need to do. You do not need to boil your water or take other corrective actions. You may continue to drink the water. If a situation arises where the water is no longer safe to drink, you will be notified within 24 hours.

What happened and what is being done?

The Village of Taos Ski Valley failed to collect the required sample during the warmer months and therefore triggered a violation. Previous TTHM and HAA5-1 samples have been collected in previous years with no indication of any issue with our water. We anticipate resolving this issue at the next opportune time during the warmer summer month period.
