

**VILLAGE COUNCIL MEETING
MASTER DEVELOPMENT AGREEMENT AND
VILLAGE FINANCE PLAN WORKSHOP**

AGENDA

LOOKING GLASS ROOM
TAOS SKI VALLEY RESORT CENTER
TAOS SKI VALLEY, NEW MEXICO

MONDAY, APRIL 10, 2017, 9:00 A.M.

- I. CALL TO ORDER AND NOTICE OF MEETING
- II. ROLL CALL
- III. APPROVAL OF THE AGENDA
- IV. MASTER DEVELOPMENT AGREEMENT AND VILLAGE FINANCE PLAN WORKSHOP
- V. ADJOURNMENT

TM

Taos Ski Valley, Inc. Po Box 90 Taos Ski Valley, New Mexico 87525 Telephone: 575.776.2291 www.skitaos.com

April 10, 2017

To: Mayor King and Councilors Stagg, Bennett, Brownell & Wittman
CC: Mark Fratrick
From: Chaz Rockey, Taos Ski Valley, Inc.
Subject: Village Finance Plan Memo

The Village Council, Staff and community have raised a number of concerns the past several months that are based on a common concern: the financial viability of the Village as its responsibilities and commitments grow and the financial impact, if any, on Village residents. While there will be significant growth in the primary forms of revenue the Village receives as a result of private development, much of this growth has been dedicated to the TIDD, so the concerns are certainly valid.

In response to these concerns I have developed a finance plan for the Village that projects its sources and uses of funds for the twenty-five year period of 2017 – 2042. The finance plan is intended to address the following questions among others:

- Will the Village be able to fund the improvements it is identified as funding in the MDA Finance Plan?
- Will the Village be able to afford to maintain or contribute towards the maintenance and operation of the dedicated public improvements as they are completed?
- How will the Village pay for the upgraded Wastewater Treatment Plant and if debt is used to fund the project how much debt can be serviced?
- Can the Village contribute towards programs intended to improve access to TSV, by air or ground, and if so, from what source of funds?

The finance plan model is driven heavily by assumptions regarding the development program of Taos Ski Valley, Inc (TSVI). It is important to point out that there is no incentive to overstate or inflate these assumptions as the same assumptions are used to project whether TSVI will be reimbursed in full by the TIDD. Therefore, it is in the best interest of the Village and TSVI to use conservative assumptions. As an example, only development by TSVI is included in the analysis. The analysis assumes zero construction/development by any other landowner in the Village for the next 25 years. Any non-TSVI development that does occur will be considered 'gravy' to the financial results of the analysis.

Upon review of the past two annual Village operating budgets and obtaining an understanding of the constraints on certain cash flows the Village receives I have segregated the model into the following three sections:

1. Governments Operations – fire, EMS, police, roads and general activities
2. Public Works – includes the wastewater treatments plant and Kachina Water Tank
3. Lodgers Tax – projects future lodgers tax revenues and proposes potential uses of those funds

I understand that within the Governments Operations section certain revenues are restricted for specific uses. The section includes all revenues and expenses for each of the areas mentioned above and assumes any shortcoming in any one area (e.g. roads) can be subsidized by the general fund.

Included in my package to you are a summary schedule, individual analysis for each of the three sections and your FY 2017 budget in a one-page summary format. In an effort to facilitate your review of the analysis below is a narrative of my approach and assumptions in each section.

Government Operations

- Gross Receipts Tax revenue represents the Village's portion of future GRT that is driven by TSVI development, increases in visitation (310,000 skiers max in winter and 25,000 max in summer/fall) and inflation. It assumes 50% of the Hold Harmless GRT is dedicated to the TIDD.
- Property taxes revenue is the Village portion with growth only for TSVI development and assessment increases every three years by the County.
- Impact Fees revenue incorporates the reductions for TSVI developments per the MDA.
- Recurring grants and other state programs are held flat.
- No capital outlay is assumed other than the \$50k in the FY 2017 Village budget.
- Existing & Recurring Operating Expenses are based on the FY 2017 budget and grow at the rate of inflation or higher for compensation.
- Incremental Operating Expenses assumes three full-time employees are added in the areas covered in this section. It also includes the incremental costs of maintaining Sutton Place, Ernie Blake and Thunderbird Roads post-improvements/realignment.
- Debt Service is for the Taos Mountain Lodge loan. All other existing debt is included in the Public Works section.

Public Works

- Existing EQR and Gallons of Water sold were obtained from the Village Staff and are increased only for TSVI development. To be conservative I assume the consumption of the existing bed base slightly decreases over time due to competition and obsolescence.
- I assume an annualized occupancy of 40% for all beds in the Village and use this to come up with an estimated consumption of water per fully occupied existing EQR. I use this number to calculate the incremental impact of TSVI development – assuming no more than 50% occupancy for The Blake Hotel and no more than 35% occupancy for residential units (condo's, townhomes, etc).
- Revenue assumes annual rate increases of 4% are reduced to 3% starting in 2024

- WWTP Fixed Costs-Current are based on the FY 2017 budget and supplemental info from Nancy Grabowski and assumes all open positions within the that budget are filled.
- WWTP Fixed Costs-Incremental assume two full-time positions are added to run the new facility.
- WWTP Variable Costs are based upon the FY 2017 budget and used to come up with a cost per gallon of water sold. It is assumed the new facility is 15% more efficient than the existing facility and that efficiency improvements decreases 1% per year.
- Kachina Tank Operating Expenses represents a placeholder of \$50k/year that increases for inflation.
- Debt Service includes all existing loans and \$6.5m borrowed from the USDA at 3.375% interest with a 40 year term (\$300k/year debt service) for the new WWTP.
- The reserve balance increases significantly over the twenty-five years and will provides funds for a replacement facility in the future.

Lodger's Tax

- Existing Lodger's tax is assumed to be \$300k, which is a reduction from last year because it was inflated by Blake construction workers. This based amount is decreased slightly over time due to competition and obsolescence.
- Incremental Lodger's tax consists of The Blake, with no more than 50% annualized occupancy, and by new condominiums and other housing, with no more than 15% annualized occupancy for renters. Rates only increase for inflation.
- Future proposed outlays in addition to current uses of lodger's tax includes the contribution towards plaza/pedestrian spaces accessed by easement and support of airlift and ground transport programs.

Summary

Overall, I feel the analysis addresses the questions listed at the beginning of this memo regarding the future liquidity of the Village. Individually, each section of the analysis shows the current reserve balance growing over the next twenty-five years while meeting its operating or debt obligations. In the event the assumptions of growth are not lived-up to revenues will not grow as much as projected, but neither will expenses. Specific to the Public Works analysis the Village has the ability to control its revenue stream through its annual adjustment of rates. The Easement Agreement for the plaza and pedestrian spaces includes a provision making the Village annual contribution subject to availability of funds. The Lodger's tax board can fund airlift, ground transport and other programs as funds are available – it is not legally bound to fund in perpetuity.

The original Plan of Finance created during the time of TIDD formation assumed a \$4m contribution to the principal balance of certain public improvements. As we have heard from the public there is considerable concern regarding the formation of a PID. This plan assumes a PID is not formed, but in order for this to work and for TSVI to follow through with funding all improvements it is assumed to fund in the MDA Plan of Finance an alternative cash flow source similar to what the PID would have provided is needed. This is where the 50% dedication of the Hold Harmless GRT comes in. Based on the findings of this analysis the Village can dedicate these funds to the TIDD and still meet its financial obligations in the future. TSVI will have replaced its cash flows from a PID and residents will not be assessed for the public improvements.

I look forward to reviewing this information with you all next Monday.
